REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claim 1

The prior art of record neither anticipates nor fairly and reasonably teaches a method for monitoring and managing a project comprising, inter alia, the steps of: setting a tasking horizon based on a predetermined time interval; and associating at least two verbs with at least one task related event for each of a plurality of tasks.

Regarding claim 10

The prior art of record neither anticipates nor fairly and reasonably teaches an apparatus for monitoring and managing a project comprising, inter alia, a management module for breaking a project into a plurality of tasks, for setting a tasking horizon and for assigning at least two verbs for at least one of said plurality of tasks.

The most remarkable prior art is to Duncan, William R.: "A Guide to the Project Management Body of Knowledge", PMI

Application/Control Number: 09/536,377 Page 3

Art Unit: 3625

Standards Committee, Project Management Institute (1996)
(hereafter "Duncan") and Levinson (U.S. Patent No.
6,047,260) (hereafter "Levinson").

The Examiner notes that the phrase "tasking horizon" is defined by Applicant as "a realistic planning window that corresponds to the length of time most employees can plan their work" (specification, page 6), "[t]he farthest point in time in the future where a manager believes a task will be completed as planned" (specification, page 8), and "a realistic window of time over which tasks can be scheduled" (specification, page 11). In other words, and as interpreted by the Board of Appeals (see Decision mailed September 27, 2005), a tasking horizon is a time in the future by which a task should reasonably be expected to be completed, not the scheduled or estimated completion date. In view of such interpretation, Duncan differs from this inasmuch as Duncan discloses estimating the amount of time needed or, rather, planning a time span defined by targeted start and stop dates. Levinson fails to remedy the deficiencies of Duncan.

Further, regarding the term "verb", Appellant has argued (Brief: at page 10) that a "verb" is:

Application/Control Number: 09/536,377 Page 4

Art Unit: 3625

"predefined, structured set or sets of words and/or phrases selected during the planning stages of the project, before the tasks are assigned to be performed by specific workers."

The Board of Appeals finds no such teaching in Duncan.

Regarding claim 24

The prior art of record neither anticipates nor fairly and reasonably teaches a method for monitoring and managing a project, comprising, inter alia, the steps of: accessing a look-up table containing historical data; and comparing the historical data with the information in the current task table.

Regarding claim 29

The prior art of record neither anticipates nor fairly and reasonably teaches an automatic project updating module for monitoring and managing a project, comprising, inter alia: a processor database system for processing captured information relating to the performance of a plurality of tasks and generating a current task table, and a look-up table containing historical information relevant to all project and task data within said data processing system.

Application/Control Number: 09/536,377

Art Unit: 3625

The most remarkable prior art of record is to Duncan and Levinson.

Page 5

Duncan, however, merely considers historical data, which is not a look-up table. Duncan fails to disclose a historical data look-up table nor comparing the information in a look-up table with a current task table or automatically updating the status of the project based on that information. Likewise, Levinson fails to remedy the deficiencies of Duncan.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S COMMENT

Drawings

The replacement drawings filed June 23, 2003 have been approved.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
